

## WOCA Wood Cleaner

- For unfinished, oiled or soaped wood surfaces indoors.
- Basic cleaning and grease removal.
- High efficiency.
- Certified green by IBR.

### Product Data

Container: 1 and 2.5 liter

Consumption: +/- 2,000 s.f./liter.

### Tools

2 buckets & mop,

Clean tools with water and soap

### Description

**Wood Cleaner** may be used for the cleaning of lye treated, soaped, oiled, waxed and unfinished surfaces. Furthermore, it is well suited for cleaning of unfinished wall and ceiling panels, furniture etc. Removes grease, dirt and soap residues.

### How to do...

- 1** Mix a cleaning solution of 1/4 cup Wood Cleaner per gallon of lukewarm water. Always work with two buckets one with the Wood Cleaner solution and one with clear water. Mop lengthwise of the wood and leave the solution on the floor surface to dissolve dirt if necessary.
- 2** Scrub with a brush or pad manually or with a buffer if very dirty. Wipe clean with the mop. Always wipe a second time to minimize water left on surface.
- 3** Rinse the mop head in clean water, wring well, and continue. Repeat if the floor is extremely dirty.

Allow the wood to completely dry before finishing.
