

# WOCA Master Soap

- industrial and frequent maintenance of wood surfaces

Preparing today for tomorrow

- For the cleaning and maintenance of all wood floors
- Particularly suitable for larger floors with frequent cleaning
- May be applied both manually and by machine
- Certified by IBR

## Product info

Container: 5 litre

Consumption: 320-400 m<sup>2</sup>/litre

Available in natural

## Application area

Master Soap is used for the regular cleaning of all wood floors. Master Soap is particularly suitable for floors that are exposed to extremely hard wear, e.g. in museums, restaurants, kindergarden, schools or airports.

## Result

Master Soap cleans gently without leaving a film.

## Application

May be applied both manually with a mop/cloth or by machine.

## After care

Not required

## Maintenance and cleaning

In case of extreme dirt use Wood Cleaner. Maintenance with Maintenance Oil or Paste.

# How to do...

- WOCA Master Soap:  
industrial and frequent maintenance of wood surfaces

## Tools

2 plastic buckets, mop,  
doodlebug, floor cloth or possibly  
cleaning machine.

Clean tools with water and soap.

**Master Soap is especially suitable for the frequent cleaning of oiled or waxed floors of all wood species as well as for vinyl, stone, and PVC surfaces.**

**A wood floor which is cleaned with Master Soap should regularly be maintained with Natural Soap or Maintenance Oil/Maintenance Paste to keep its hard-wearing surface, as Master Soap has no nourishing properties.**

Mix 250 ml Master Soap with 10 l of warm water for the daily cleaning.

- 1** Clean the floor lengthwise of the wood grain. It is recommended to use two buckets - one with the soap solution and one with rinse water. Use a cleaning machine if necessary.
- 2** It is important that no water is left on the floor. Use as little water as possible to obtain a satisfactory result. Particularly dirty floors/stains may be cleaned with Wood Cleaner.
